

12 January 2017

## STAGE 1 OFFICIALLY COMPLETED - WORK STARTS ON STAGE 2

**Project update: Australian Gas Networks (AGN) is pleased to confirm that significant work has been achieved on the construction of McLaren Vale's natural gas reticulation network.**

AGN's network operator, APA Group, confirms that work in Stage 1 has been completed, with all gas mains laid and commissioned per the project plan.

Work in Stage 2 commenced in late December 2016, and will recommence on Monday, 16 January 2017. Seychell Construction is the company appointed by APA to undertake the work in this area.

Streets where gas works will occur first are as follows:

- Acacia Court
- Aldersey Street
- Genders Grove
- Hall Street
- Harvest Drive
- Ivyburn Close
- Pridmore Avenue
- Scotcher Place
- Seaman Court
- Todd Street
- Vales Close
- Vine Street
- Wattle Street
- Woodley Grove

Further updates will be released in the coming months, once more work has been completed in these streets.

A full map showing the proposed reticulation network for Stage 2 can be downloaded from the [Natural Gas in McLaren Vale website](#) (under 'Progress Maps'), and will be updated as progress is made.

Residents in the McLaren Vale community are reminded that AGN is offering eligible households a number of generous rebates for connecting to natural gas, with eligible homes also qualifying for a one-off \$500 Connection Bonus. More details about these offers can be found on the [McLaren Vale Promotions page](#).

**For further information about any of the above, contact:**

- AGN's Natural Gas Rebate Team (08 8115 4443, 08 8115 4441)

**Looking to connect?** Just call our McLaren Vale Connections Representative on 1300 001 001 (Option 4) to find out how easy it can be to turn your home into a natural gas home.
